An annotated list of the species of spiders found in South Dakota, compiled from records in the author's collection (KMP), the Denver Museum of Nature and Science (ZA), and published journal articles; name combinations reflect current nomenclature and synonymies in accordance with Platnick (2012). The column headings are largely self-explanatory; "BG" refers to images available on the University of Iowa's BugGuide Web site and are in the form <http://bugguide.net/node/view/xxxxx> where 'xxxxx' is the BG number given.
